

Firewall Challenge report

November 27, 2008

Tested product: Mamutu 1.7.0.23
Product vendor: Emsi Software GmbH
Testing platform: Windows XP Service Pack 3
Number of tests: 84

Level reached: 1
Total score: 2 %

Introduction

This report presents results of *the Tested product* in the series of tests known as [Firewall Challenge](#). All the information regarding these tests, testing methodology and scoring system is available on [the website of this project](#). Reports of the commercial testing usually contain results of all available levels, reports of the public testing usually contain results of the first level and the following levels up to the highest level reached by the tested product. Public testing results are always published on the project's website, while the results of commercial testing are published only after the consent of the paying customer. The total score is always calculated as if the report was public.

Note that the number of levels, the number of tests or even the tests implementation may change. The report's results are valid at the day of the report's release and are not guaranteed to be valid after that day.

Level up: 50 %
Product's score: **Not reached**

Level 4

Level up: 50 %
Product's score: **Not reached**

Level 5

Level up: 50 %
Product's score: **Not reached**

Level 6

Level up: 50 %
Product's score: **Not reached**

Level 7

Level up: 50 %
Product's score: **Not reached**

Level 8

Level up: 50 %
Product's score: **Not reached**

Level 9

Level up: 75 %
Product's score: **Not reached**

Level 10

Level up: 100 %
Product's score: **Not reached**

Further notes

Technically, Mamutu passed Coat because a popup query was displayed and the user had a chance to block the attack. However, the query asked about Internet Explorer accessing the Internet and the recommended action was to allow the action. It could be assumed that many users would allow the action.
