

Proactive Security Challenge report

February 21, 2010

Tested product: avast! Internet Security 5.0.418.0
Product vendor: ALWIL Software a.s.
Testing platform: Windows XP Service Pack 3, Internet Explorer 8
Number of tests: 148

Level reached: 1
Total score: **3 %**

Introduction

This report presents results of *the Tested product* in the series of tests known as [Proactive Security Challenge](#). All the information regarding these tests, testing methodology and scoring system is available on [the website of this project](#). Reports of the commercial testing usually contain results of all available levels, reports of the public testing usually contain results of the first level and the following levels up to the highest level reached by the tested product. Public testing results are always published on the project's website, while the results of commercial testing are published only after the consent of the paying customer. The total score is always calculated as if the report was public.

Note that the number of levels, the number of tests or even the tests implementation may change. The report's results are valid at the day of the report's release and are not guaranteed to be valid after that day.

Testing results

Level 1

Number of tests: 12
Level up: 50 %
Product's score: 42 %

Test name	Result	Comment
Autorun1	0 %	FAILED

Level up: 50 %
Product's score: **Not reached**

Level 4

Level up: 50 %
Product's score: **Not reached**

Level 5

Level up: 50 %
Product's score: **Not reached**

Level 6

Level up: 50 %
Product's score: **Not reached**

Level 7

Level up: 50 %
Product's score: **Not reached**

Level 8

Level up: 50 %
Product's score: **Not reached**

Level 9

Level up: 50 %
Product's score: **Not reached**

Level 10

Level up: 100 %
Product's score: **Not reached**

Further notes

avast! passed Coat because an alert was displayed allowing to block the attack. However, the details provided in the alert message were related to trusted Internet Explorer application and it is likely that many users would not recognize that it is a malicious attempt and would not block the attack.
